

To Run this code, Follow the steps.

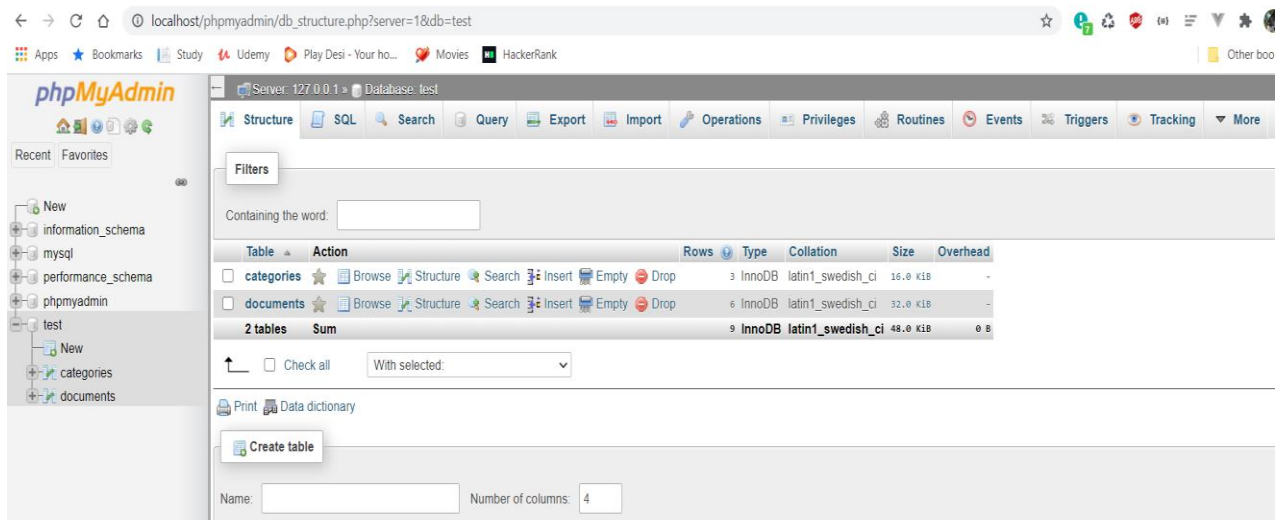

Step1: Clone the project By Git clone command.

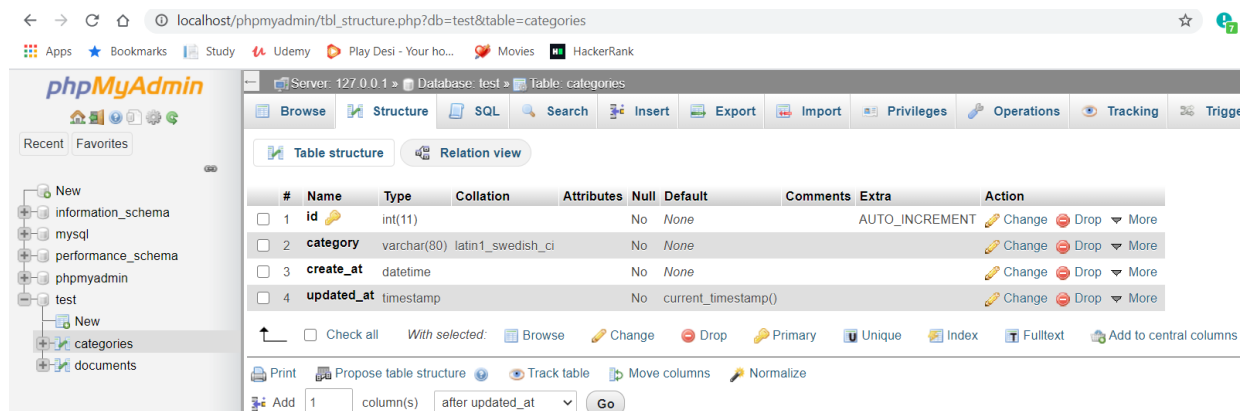

Git clone <https://github.com/PatelPriyanka/Assignment-in-VueJs-PHP.git>

Step2: First import test.sql in to phpMyAdmin by using a import button

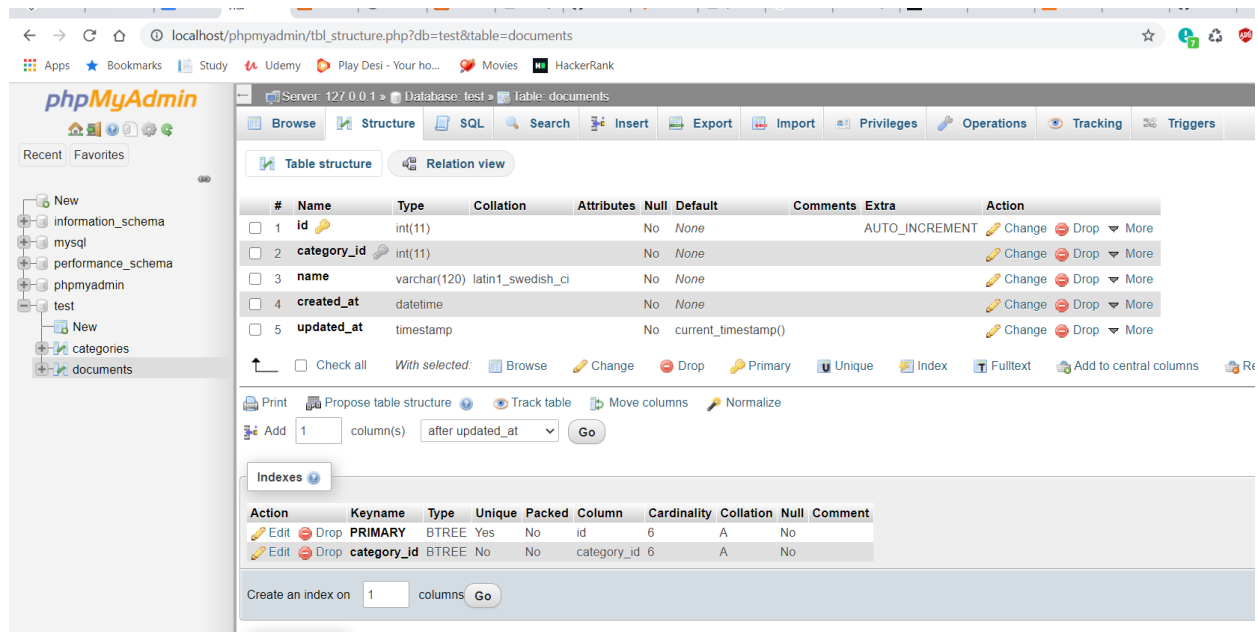

Once you successfully import the sql file you can see the database under test DB. So there will be 2 DB. One for Categories and another one for documents.

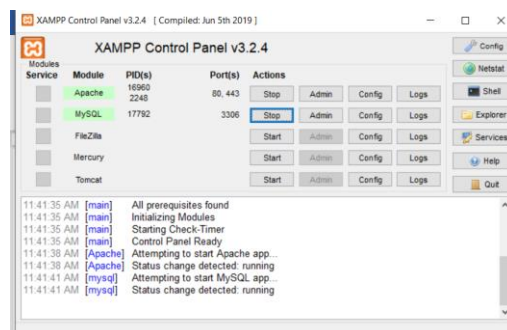

So the document table have 1 foreign key that is category_id from categories table.

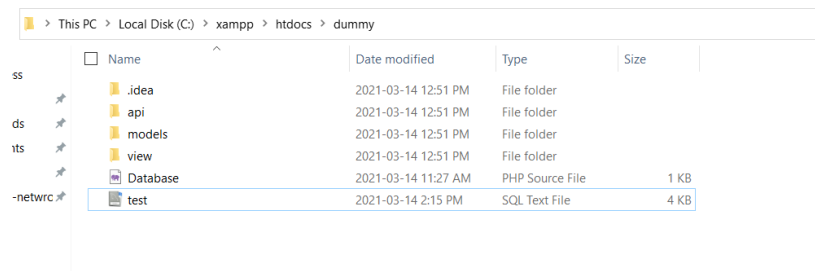

Step3: Now to run the code open your XAMPP server and start Apache and MySQL.

Step 4: Add the code folder call “dummy” in to your htdocs folder.

(Default path for htdocs: C:\xampp\htdocs\dummy)

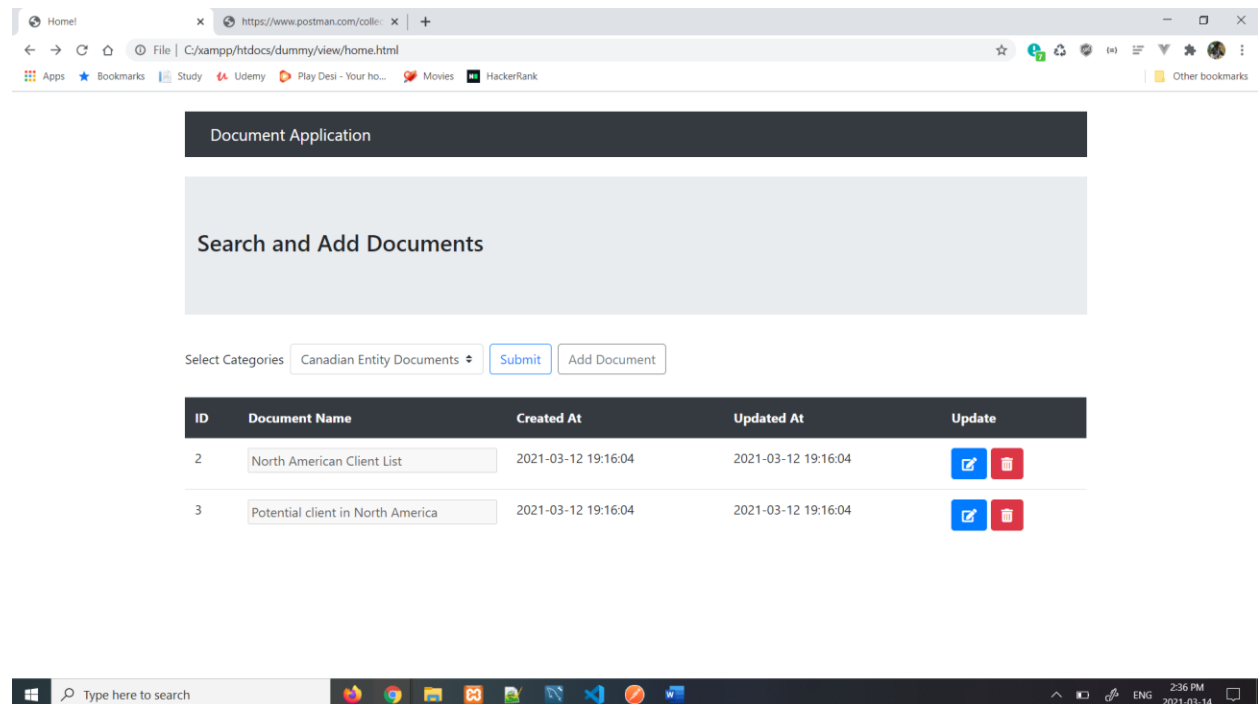

Step 5: Run the following URL to see the output on your localhost.

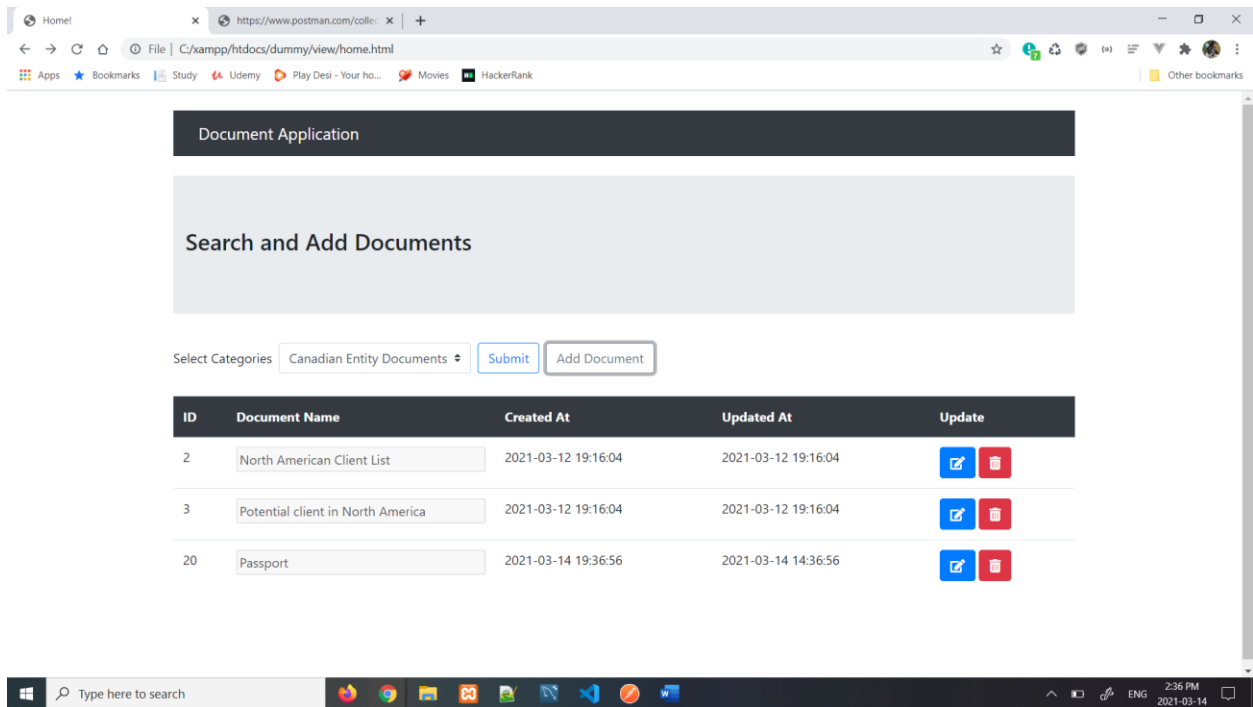

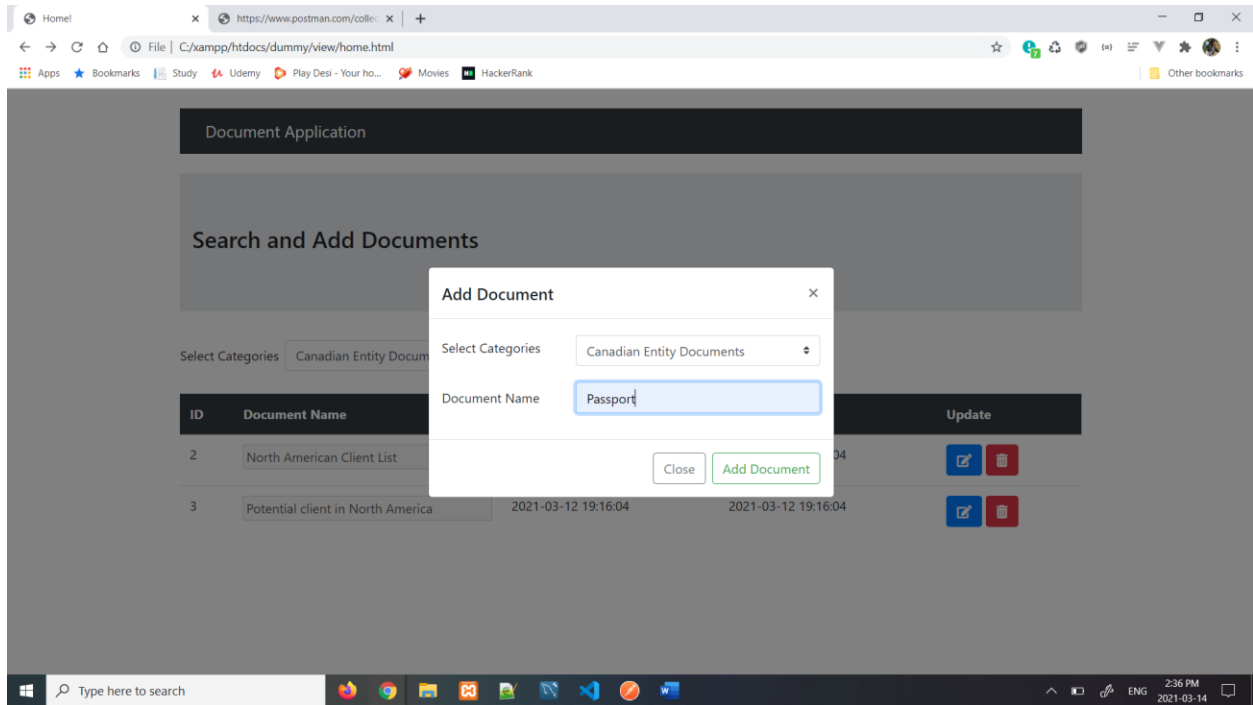

URL: <file:///C:/xampp/htdocs/dummy/view/home.html>

You can see the API URL for postman here.
